### **3QFY25 Result Highlights**

### **EBITDA** declined due to the impact of startup cost and weak demand:

- Consolidated revenue grew by 40% YoY and 30% OoQ to ₹15.76bn. However, EBITDA declined by 10% YoY to ₹1.99 billion, and PAT decreased by 82% YoY to ₹0.12bn. The EBITDA margin contracted by 687 basis points YoY and 326 basis points QoQ to 12.6%. The significant increase in other expenses and employee costs was due to the start-up costs for two greenfield facilities, Sunbeam-related costs, inflationary pressures and weak demand. Exceptional items of ₹148mn during the guarter represent expenses incurred by SLSPL in relation to relocation of its Gurgaon facility and transfer of control to the company.
- Craftsman Automation is undertaking several strategic initiatives to enhance its operations:
  - **Sunbeam Relocation:** The relocation of the Gurgaon plant has commenced, with completion expected by the 1QFY26. Following this, the company plans to consider the sale of the land. Approximately 50% of employees opted for the Voluntary Retirement Scheme (VRS) and were relieved in November 2024; the remaining are expected to be settled by April-May 2025. The plant aims to achieve EBIT neutrality by the 2QFY26 and anticipates positive EBIT for the FY2026.
  - **Kothavadi Plant:** Several samples have been supplied to customers, with production expected to begin in the 4QFY25 upon approval. The expected revenue is around ₹8.5bn for the stationary engines and machining segment including the Arasur plant in FY28-29.
  - Hosur Plant: The plant is scheduled to be operational by the 2QFY26 and is expected to reach full capacity by the 4Q. The combined peak capacity for the Hosur and Bhiwadi alloy wheel plants is projected to be around ₹8bn by FY27.
  - Industrials Segment: The company's automated storage solutions have garnered a robust order book, fully booked for the upcoming year. This strong demand positions the company to capitalize on increased profitability in this sector.

# **Management Guidance:**

- Craftsman Automation anticipates a 27% increase in consolidated revenue for the upcoming fiscal year, aiming to reach ₹7,000crs, up from the current ₹5,500crs. This growth is expected to be driven by significant contributions from the Kothavadi Plant (₹100–150crs), Bhiwadi Plant (₹300 crore), and Hosur Plant (₹150crs). The company also forecasts a 29% rise in EBITDA, surpassing ₹1,100crs, and a 40% increase in EBIT, reaching ₹70crs.
- In terms of debt management, the consolidated net debt for the current fiscal year is projected at ₹1,900crs, resulting in a debt-to-EBITDA ratio of 2.24x. If the Gurgaon land sale had happened, the debt would have been ₹16bn, bringing the ratio down to 1.88x. Hopeful to sell the land in FY26. Expects the consolidated debt to decline to ₹1400crs next year.
- Regarding capital expenditure, the company has allocated ₹850crs for FY25, with plans to reduce this amount by at least half in FY26.

### View

The company is currently managing multiple strategic initiatives, including the restructuring of Sunbeam, the stabilization of greenfield projects, and the integration of Fornberg. These efforts are occurring amidst weak demand in the Commercial Vehicles (CVs) and Passenger Vehicles (PVs) segments. Consequently, significant start-up costs incurred in the third quarter are expected to persist, potentially impacting returns over the next 12 to 15 months. Given the absence of immediate earnings catalysts and the execution risks associated with these projects, we recommend booking profits on stock. Currently, the stock trading at a P/E of 26x FY26E EPS of ₹151.5.
